

KEYCHAIN SYNCH

BATCH DATA
COLLECTION SOFTWARE

KEYCHAIN SYNCH SOFTWARE ENABLES SEAMLESS DATA CAPTURE AND DOWNLOAD FROM THE OPTICON OPN2001 OR SYMBOL CS1504 KEYCHAIN SCANNER RIGHT TO A PC.

An easy-to-use, intuitive application, Keychain Synch decodes and outputs bar coded data to a Comma Separated Value (CSV) and Access Database format. Simply install the Keychain Synch software, scan barcodes with the keychain scanner, and synchronize data to the PC. Keychain Synch saves the decoded data and date-time stamp in a comma delimited (CSV) text file in the application folder. The file is ready for import into any application compatible with CSV format.

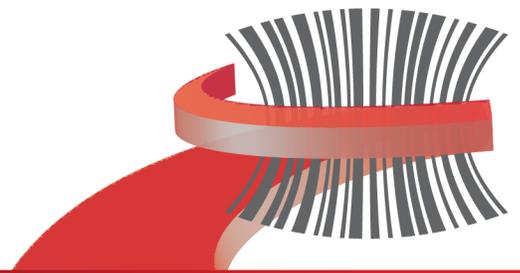

New in version 2:

- FTP Synch - send a copy of the data file to an FTP server automatically
- E-mail Synch - send a copy of the data to an E-mail recipient after the download
- Device Folders - Use a different Download Folder for each of your devices (i.e. one device for shipping and one for receiving)
- External Commands - run external processes after a successful synch
- Combine Quantities - combine scans to form a quantity field

Key Benefits of Keychain Synch

- Inexpensive Data Collection: Keychain Scanners Offer a Budget Alternative To More Expensive Scanners
- Flexible Data Management Through CSV or Access Database
- E-mail & FTP Synchronization for Off Site Integration
- Custom Programming to Fit Your Specific Requirements
(Custom Programming Is Provided on a Time and Materials Basis)

KEYCHAIN SYNCH

BATCH DATA
COLLECTION SOFTWARE

Software Features

- Intuitive Operation
- One Step Data Download
- CSV Text File Output
- FTP Text File Export
- E-mail Text File Export
- Quantity Combining
- Data Folders for Each Keychain Scanner
- Auto Process After Synch

SUPPORTED PERIPHERALS

Keychain Scanners

- Opticon OPN2001 (Recommended)
- Symbol CS1504

Hardware Requirements

- Windows 2000 or greater, 32-bit version
 - Pentium class computer and above
 - 50 MB free hard drive space
 - 64 MB RAM Minimum
